

## **BE FIRST TO MAKE IT AND FIRST TO MARKET**

Today's consumers in the Consumer Packaged Goods (CPG) & Retail industry are no longer concerned with just product quality and price, they now want to be part of a collaborative product experience. When a brand or retailer fails to deliver on these expectations, consumers will move on. As a result, CPG product lifecycles are getting shorter. Leading CPG and Retail companies are leveraging digital solutions to deliver innovation from concept to consumer with extraordinary speed to delight consumers and drive sustainable business growth.

At Dassault Systèmes, we believe the virtual world extends and improves the real world. That means a virtual experience twin can be used to simulate what is likely to happen in the future. It allows for testing, analyzing and understanding of ideas, products and processes that couldn't be done in the real world. In this way, decisions can be made faster, saving valuable time, money and effort.

The innovations that work are the result of collaboration between teams of scientists, engineers, designers, consumers, marketers, planners, external agencies, etc. The Dassault Systèmes **3DEXPERIENCE**® platform is the only digital innovation platform that can dissolve the silos between departments, streamline processes, and enables fast and smart decision making so that you can create your future growth.
